

Nahuel López

Web Engineer · UX/UI Designer

Argentina · Remote Friendly

Profile

Digital product builder focused on creating scalable systems, not just websites. Strong background in frontend architecture, UX strategy, and modern web tooling. I design and develop interfaces that are fast, accessible, maintainable, and aligned with real user behavior. I work comfortably between design and engineering, translating complex problems into clean digital experiences.

Core Skills

- Frontend Engineering: Astro, React, TypeScript, TailwindCSS
 - UX/UI Design: Design Systems, Interaction Design, UX Strategy
 - Architecture: Modular systems, component-driven development
 - Performance: Optimization, SEO, accessibility
 - Tooling: Git, CI/CD, Vercel, modern build systems
 - API & Backend Integration: REST, SSR/SSG hybrid architectures
-

Tech Stack

Frontend: Astro, React, TypeScript, TailwindCSS, Vite

Backend / Infra: Node.js, Serverless, Vercel, SSR/SSG hybrid setups

Design: Figma, Design Tokens, Component Systems

Other: GitHub, CI/CD pipelines, API integration

Experience

Frontend Developer / UX Engineer

Freelance & Independent Projects

Design and development of digital products focused on performance, scalability, and UX quality.

- Architecture of component-based systems
- UX-driven interface design
- SEO-first and performance-first builds
- Internationalization (i18n)

- Multi-language and dynamic routing systems
-

Philosophy

I don't build pages — I build systems.

Design and code are not separate disciplines, they are layers of the same structure. Good interfaces are engineered, not decorated.
